Subject: [URGENT] Create Firewall Rule - Mitigate malware attack
—
Body:
Hello Networks Team,

We would like to request the creation of a firewall rule and provide you more information about the ongoing malware attack.

Attack information;
An attacker was able to compromise the Spring Framework on our nbn services using zero-day vulnerability (Spring4Shell).

Firewall rule parameters:

- Block incoming traffic on client request path "/tomcatwar.jsp"
- Block incoming traffic with HTTP headers:
    -

```
suffix=%>//
c1=Runtime
c2=<%
DNT=1
Content-Type=application/x-www-form-urlencoded
```

Additional information:

- The attack appears to have been targeted at our external facing infrastructure using Spring Framework 5.3.0 - monitor for future requests to this path

For any questions or issues, don't hesitate to reach out to us.

Kind regards,
Telstra Security Operations
